SONIA[®] COMPACT

SONIA COMPACT is a flexible ultrasonic equipment designed for use in hard environments, like those found in nuclear power plants and in the industry.

MAIN FEATURES

- Compatible with TECNATOM SONIA ultrasonic system architecture.
- UT Electronics for Automated Inspections: It's designed to be remotely operated.
- Fulfils the requirements of the most common UT inspection applications in the Nuclear and industrial field.
- Flexible in configuration: Conventional UT, Phased-array or a mix of them, with internal or external UT modules.
- Gigabit Ethernet for connection with external computers.
- External modules connected using fibre optic link.
- Four incremental encoders input for interfacing with mechanical equipments.
- All electronic parts are sealed in rugged enclosures.
